MEDITERRANEAN SOCIETY FOR REPRODUCTIVE MEDICINE

in cooperation with

MONTENEGRO SOCIETY FOR HUMAN REPRODUCTION

is organizing

20 Annual meeting of the Mediterranean Society for Reproductive Medicine

Dear friends,

It is my pleasure to invite you to be our guest for XX MSRM Congress, in ancient Mediterranean city of Budva. It seems like blink of the eye the time passed from grounding society 23 years ago, and nowadays celebrating Jubilee congress, gathering so many distinguish professionals from reproductive medicine. A part of numerous congresses and regional meetings, society succeed to build name and influence in Mediterranean region and develop friendly relation to many other societies, including ESHRE.

This year, for XX Congress, we prepare numerous scientific sessions for clinicians and embryologist, debate about controversies issues, round table about hot topics and pre-congress courses with hands on training, and latest changes in field of safety and quality including changes in TD. For broader cooperation with general gynecologist and sharing same point of view we will present latest scientific news from field of contraception, menopause and PCOS. There is special spot for nurses and midwives presenting patients care in infertility treatment.

We invite you to come and take part in this impressive scientific journey, enjoying our hospitality and beauty of Montenegrin part of Adriatic.

20. Kongres Mediteranskog udruženja za reproduktivnu medicinu

Dragi prijatelji,

Sa velikim zadovoljstvom vas pozivam da budete naši gosti na XX MSRM Kongresu, koji će se održati u drevnom mediteranskom gradu Budvi. Čini se kao da su u trven oka prošle 23 godine od osnivanja udruženja, a sada proslavljamo jubilarni kongres, okupljajući brojne ugledne stručnjake iz oblasti reproduktivne medicine. Osim 20 kongresa i mnogih regionalnih sastanaka, udruženje je uspjelo da izgradi prepoznatljivo ime i uticaj u mediteranskom regionu, kao i da razvije prijateljske odnose sa mnogim drugim društvima, uključujući ESHRE.

Ove godine, za XX Kongres, pripremili smo brojne naučne sesije za kliničare i embriologe, debate o kontroverznim temama, okrugle stolove o aktuelnim pitanjima, kao i predkongresne kurseve sa praktičnom obukom. Takođe, predstavimo najnovije promjene u oblasti bezbjednosti i kvaliteta, uključujući izmjene u TD. U cilju šire saradnje sa opštim ginekolozima i zajedničkog sagledavanja perspektiva, prezentovaćemo najnovija naučna dostignuća iz oblasti kontracepcije, menopauze i PCOS-a. Poseban segment posvećen je medicinskim sestrama i babicama, koje će predstaviti aspekte njege pacijenata u liječenju infertiliteta.

Pozivamo vas da dođete i budete dio ovog impresivnog naučnog putovanja, uživajući u našem gostoprimstvu i ljepoti crnogorskog dijela Jadrana.

CONGRESS PROGRAM / PROGRAM KONGRESA

THURSDAY / ČETVRTAK 16.10.2025.

PRE-CONGRESS COURSE NO. 1. / PREKONGRESNI KURS BR. 1.

13.00–18.00 ■ HALL 1. / SALA 1.

**All about PRP treatment in infertility and IVF (theoretical and hands on training for preparation and use)
one registration fee for clinician and embryologist coming from one center**

**Sve o PRP tretmanu u infertilitetu i IVF-u (teorijska i praktična obuka za pripremu i upotrebu)
– jedna naknada za registraciju za kliničare i embriologe koji dolaze iz jednog centra.**

At the conclusion of this course, participants should be able to:

- Understand the acting mechanism of PLP and effect on different condition associated with infertility, and properly use it in infertility treatment
- Know practically to prepare PLP, count number of platelets used, and apply in daily practice according existing evidence where is indicated
- Develop potential research targets and project for unsolved issues related to use of certain treatments in IVF and related outcomes.

Na kraju ovog kursa, učesnici bi trebalo da budu u mogućnosti da:

- Razumiju mehanizam djelovanja PRP-a i njegov efekt na različita stanja povezana sa infertilitetom, te ga pravilno koriste u tretmanima infertiliteta.
- U praksi pripremaju PRP, izbroje broj trombocita koji se koristi i primijene ga u svakodnevnoj praksi u skladu sa postojećim dokazima gdje je to indicirano.
- Razviju potencijalne ciljeve istraživanja i projekte koji će istražiti neresene pitanja upotrebe određenih tretmana u IVF-u i sa tim povezane ishode.
